

Badger Meter

BEACON® AMA

At A Glance

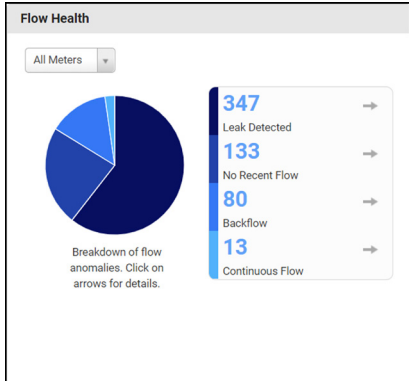

The At a Glance (AAG) page acts like a dashboard, giving you quick access to vital information through modules. The first time you access BEACON, it opens in a default module layout. You can customize that layout to suit your needs, for example, repositioning the modules that you use most frequently at the top of the page or removing modules that you do not use often.

For more detailed instructions for the customization process or for a complete breakdown of all module functions please refer to the BEACON Help page at <https://helpbeaconama.net/using-beacon-ama/using-beacon-ama-the-at-a-glance-page/>

For all modules:

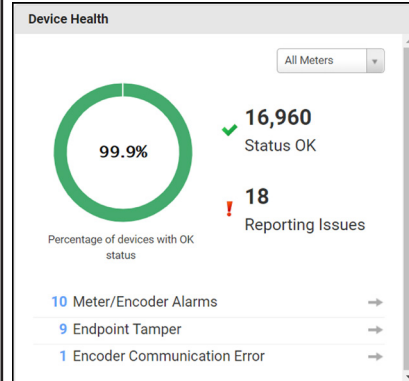

- Click grey arrow → to access the Monitor page to view linked account details.
- Click a drop down menu  to select additional options.

Flow Health

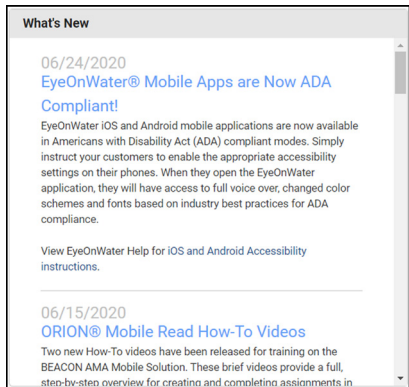

Provides an overview of the flow anomalies in your water system

Device Health

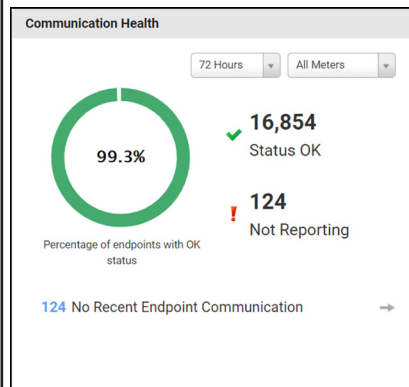

Provides a snapshot of the number and percentage of devices (endpoints, encoders and meters) reporting with and without issues

What's New

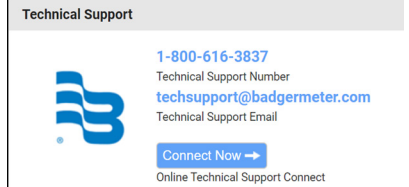

Displays announcements about recently released new features and system improvements

Communication Health

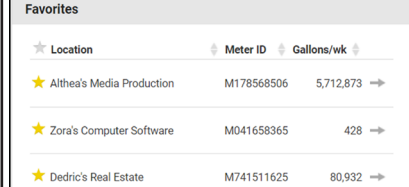

Provides a snapshot of endpoint communication

Technical Support

Displays contact information for the Badger Meter Technical Support team

Favorites

Displays water usage for service locations designated as favorites

★ Location	⚙ Meter ID	⚙ Gallons/wk
★ Althea's Media Production	M178568506	5,712,873 →
★ Zora's Computer Software	M041658365	428 →
